I. *Understanding The Problem*

200+
invoices per week

2 days
manual work per week

Late Payments

Due date missed when clerk is away

Missed Duplicates

Vendors re send invoices, no detection

Zero Audit Trail

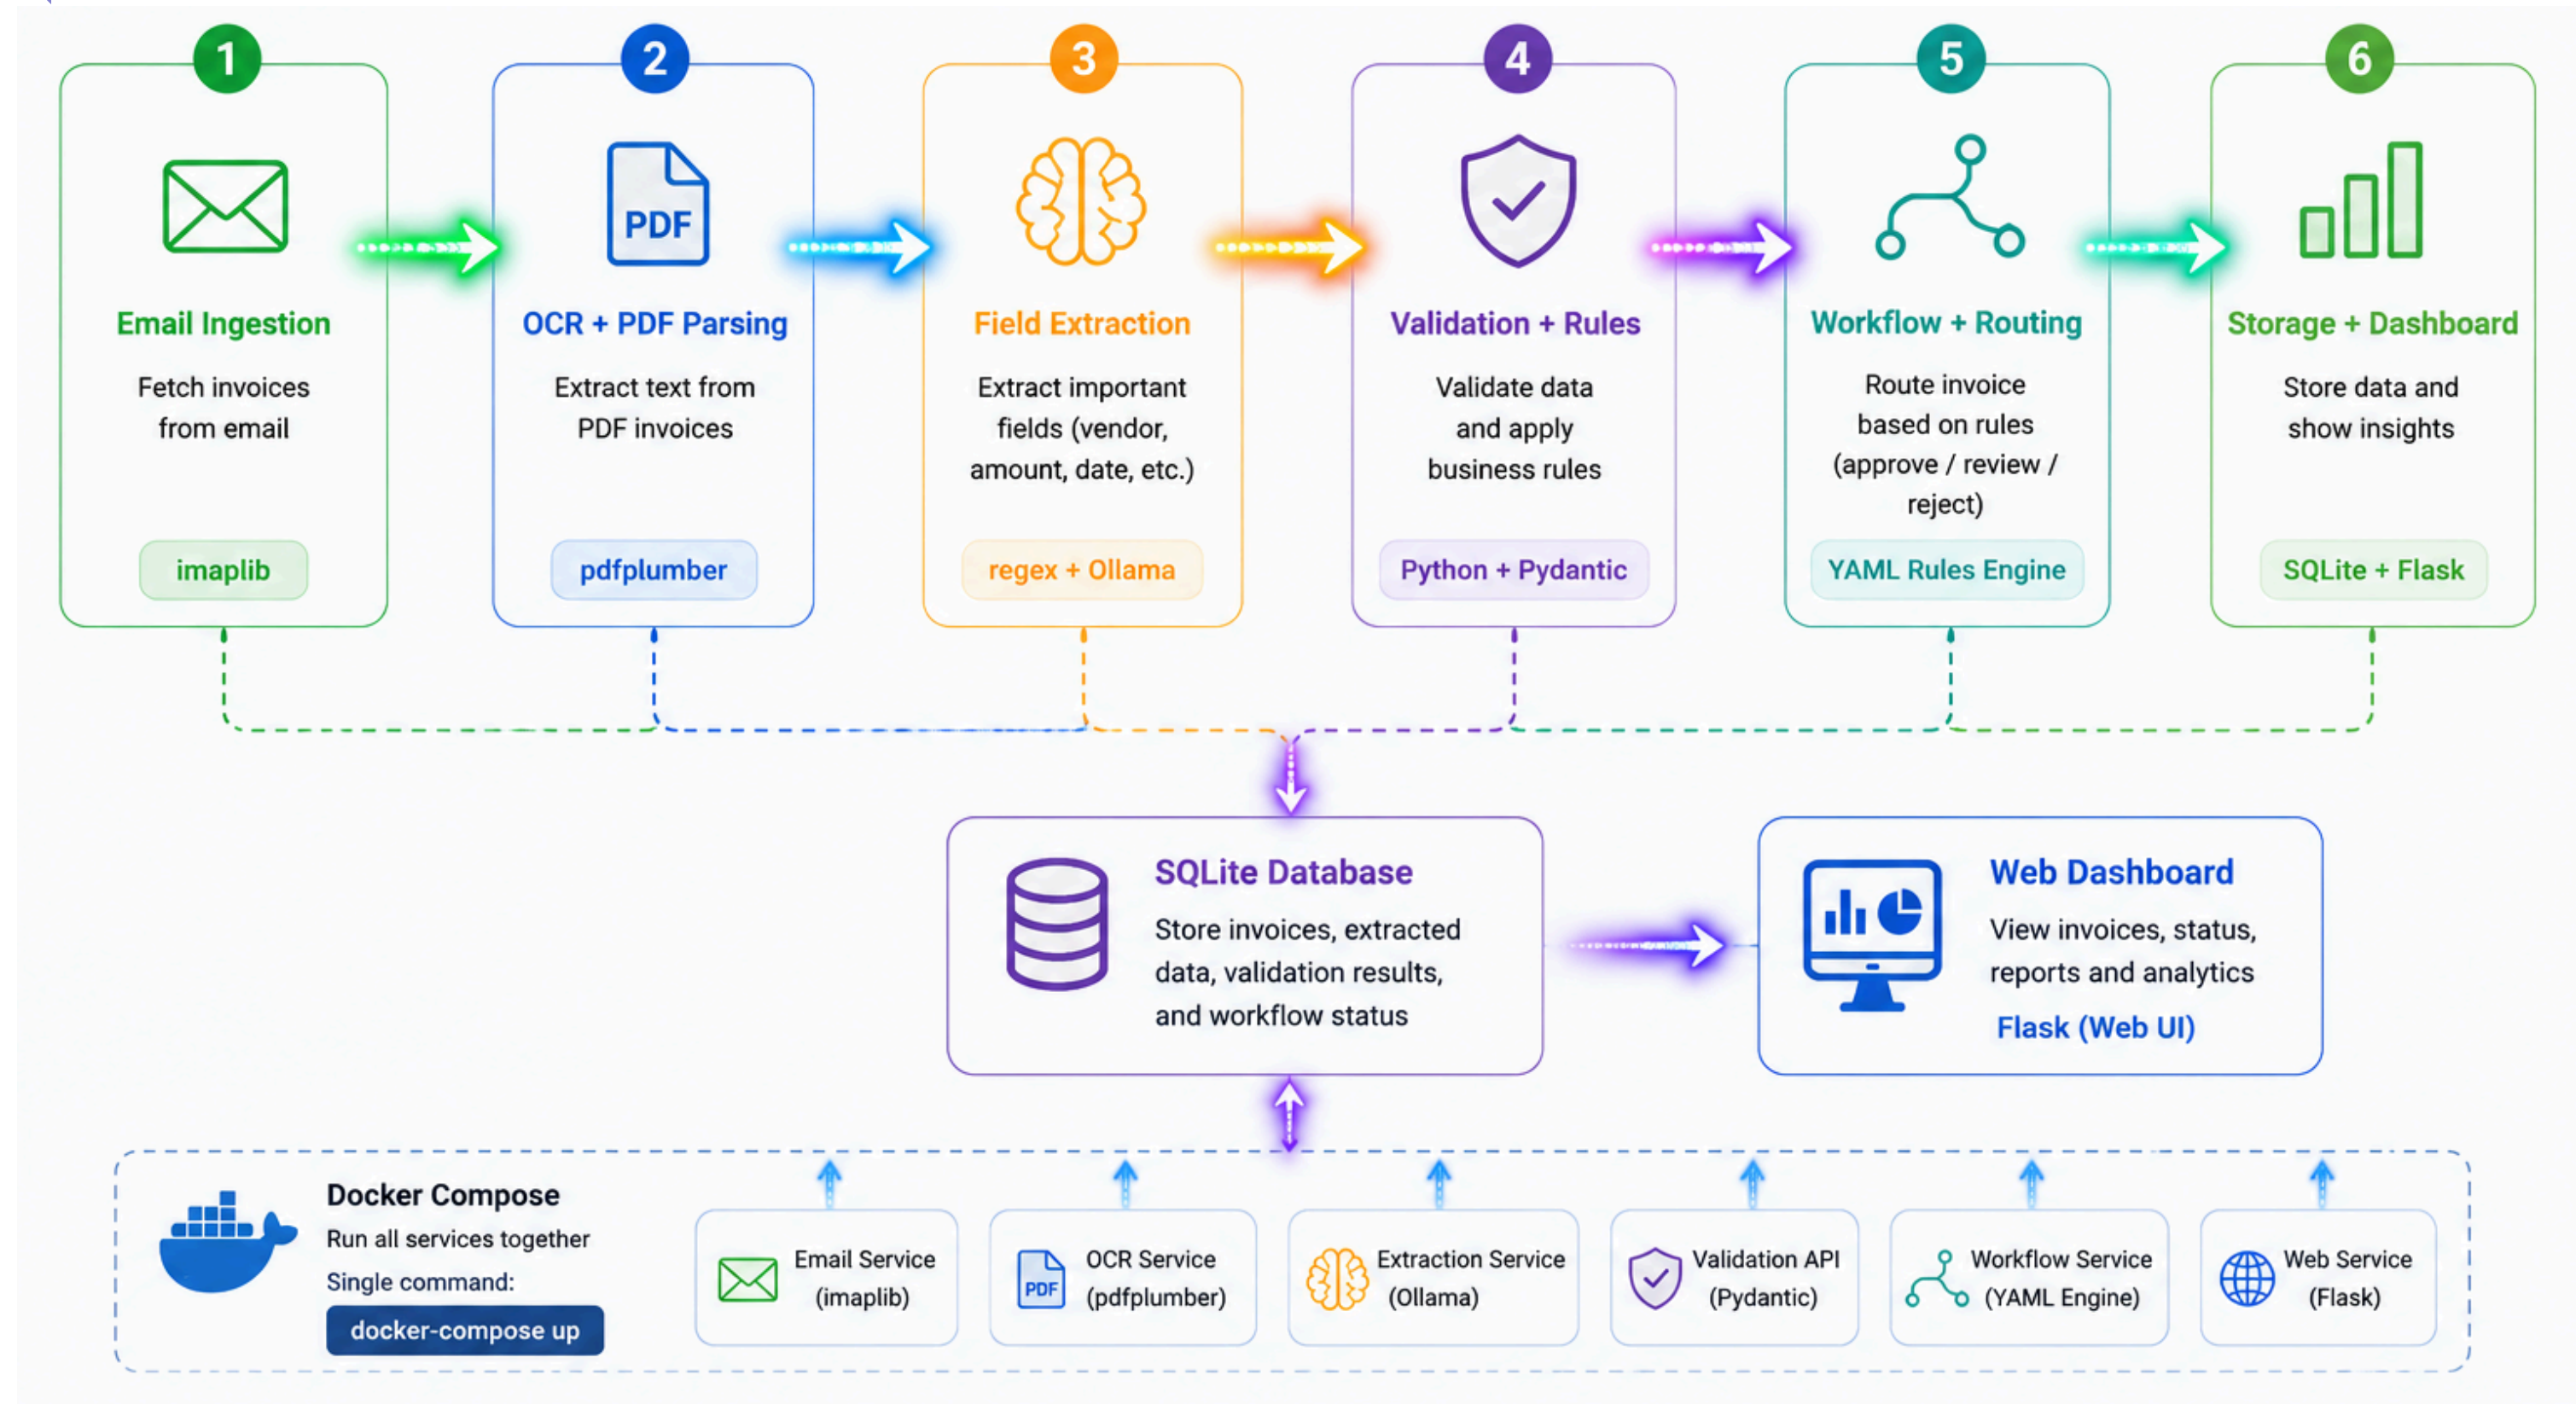

No record of who approved what or when

Manual Data Entry

Copy paste errors into spreadsheet

2. System Architecture

3. *Tools Justification*

imaplib

Python stdlib — zero install, works with any IMAP inbox

pdfplumber

Reads digital PDF text directly — no OCR needed for clean files

Tesseract

Industry-standard open-source OCR fallback for scanned PDFs

regex + dateutil

Fast, reliable extraction of structured fields (dates, amounts)

Ollama + LLaMA 3

Free local LLM for messy/complex invoice layouts — fully offline

hashlib + Python

MD5 hash catches exact duplicates; field-match catches re-sends

YAML rules file

Routing rules configurable without touching code

SQLite

Zero-config, file-based DB — perfect for single-machine deploy

Flask + Jinja2

Available in environment; same result as Streamlit, one less dep

4. *Test Invoices*

Search vendor, invoice #, approver...

All statuses

#	FILENAME	VENDOR	INVOICE #	DUE DATE	AMOUNT	APPROVER	CONFIDENCE	STATUS	ACTION
1	invoice_001_acme.pdf	Acme Supplies Ltd	INV-2024-001	2024-02-15	\$1,875.00	Finance Manager	100%	PENDING	Approve
2	invoice_002_globalte...	GlobalTech Solutions	INV-GT-0892	2024-02-18	\$1,710.00	IT Manager	100%	PENDING	Approve
3	invoice_003_missing...	FastShip Couriers	INV-FS-3301	Missing	\$550.00	Department Head	85%	FLAGGED Missing field: due_date — cannot schedule payment	
4	invoice_004_duplicat...	Acme Supplies Ltd	INV-2024-001	2024-02-15	\$1,875.00	—	100%	PENDING	Approve
5	invoice_005_highval...	Enterprise Systems Corp	INV-ESC-7741	2024-02-22	\$19,200.00	CTO	100%	PENDING	Approve

5. *Workflow Findings*

All 5 test invoices processed correctly end-to-end

Field extraction at 100% confidence on clean invoices

Duplicate detection fires on re-submitted invoice numbers

Routing rules fully configurable via YAML — no code changes

Full audit trail: every state change logged with timestamp

One-command startup: docker-compose up

6. System Deliverables

**200+
invoices per week**

**2 days
manual work eliminated weekly**

Quick Payments

Removed Duplicates

Invoice Track With Audit Trail

Automatic workflow

Thank You
